EDUCATION

University at Buffalo

Bachelor of Science in Computer Science

Buffalo, NY

Aug. 2024 – May 2026

Relevant Coursework

Data Structures, Algorithms, Software Engineering, Systems Programming, Distributed Systems, Database Systems, Computer Organization, Programming Languages, Operating Systems, Discrete Structures, Computer Networks

SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS, R, Go

Developer Tools: GitHub, Jupyter Notebook, Linux, Microsoft 365 Suite, Git, Docker, VS Code, Visual Studio, MATLAB, Jira, ServiceNow

Other: Teamwork, Leadership, Adaptability, Self Confidence, Problem-Solving, Time Management, Customer Service, Technical Support

EXPERIENCE

IT Internship

Kaleida Health

June 2025 – August 2025

Buffalo, NY

- Supported the **Clinical Network Services (CNS)** department at Buffalo General Hospital by troubleshooting hardware, software, and network issues across multiple departments, improving technical uptime and response time.
- Assisted with imaging, configuring, and deploying laptops for hospital staff to ensure seamless onboarding and system readiness.
- Gained hands-on experience in server room operations, including wiring, rack setup, and configuration of new servers at Buffalo General Hospital and the Larkin Building.
- Collaborated with the Cybersecurity team to monitor network activity, review security logs, and assist with access management to improve system security and compliance.

PROJECTS

Maze Escape Solver | *DFS and BFS Shortest Path Finder (C++)*

- Developed a program to solve maze escape problems using Depth-First Search (DFS) and Breadth-First Search (BFS) algorithms.
- Implemented functionality to identify paths through mazes of varying sizes and complexity, highlighting differences in traversal strategies.
- Built a program to compute shortest paths in weighted graphs using Dijkstra's and Floyd-Warshall algorithms.
- Designed a flexible system to accept user-defined graphs and dynamically update weights for edge cases.

Budgeting App (StashUp) | *Git, GitHub, React, Vite, JavaScript, CSS, HTML, Supabase*

- Built a full-stack budgeting web app to help users track income, expenses, and spending habits in one place.
- Developed responsive front-end pages for adding transactions, organizing budget data, and improving user experience.
- Integrated Supabase to store and manage financial records, including income, expenses, and category-based transactions.
- Used Git and GitHub for version control, feature updates, and collaborative development throughout the project.

IPL Data Pipeline with Match Prediction System | *Apache Spark, HDFS, Python, MLlib*

- Built a distributed data pipeline using Apache Spark and HDFS to process IPL ball-by-ball data with 278K+ records.
- Designed data preprocessing and feature engineering workflows for scalable analysis and model training.
- Implemented and tuned Logistic Regression and Linear Regression models using Spark MLlib with cross-validation.
- Analyzed match factors such as venue, toss, and scoring phases to generate insights and evaluate model performance.

LEADERSHIP EXPERIENCE

Sikh Student Association, University at Buffalo | *Treasurer*

August 2024 – Present

- Build and maintain partnerships with local organizations to support club initiatives and events.
- Develop outreach strategies to engage the community and increase event participation.
